Response by EPA: Mr. Todd Downham, Oklahoma Department of Environmental Quality (ODEQ), Project Officer for the Wilcox Site, previously contacted you on Feb 3, 2014 and informed that the property is within the current Superfund Site boundary.

He clarified that the property was previously owned by Mr. (b) (6).

The US EPA, in coordination with ODEQ, will further investigate this Site to determine if any further remedial action is required. We will appreciate your cooperation with the Federal and State agencies during the upcoming investigations.

You may get additional information about the status of the site by visiting the Superfund Site Summaries in the EPA web site at <http://www.epa.gov/region6/6sf/pdffiles/wilcox-ok.pdf>

We are also adding your name to the site mailing list, so that you will receive future information by mail.
